**wire drawing, rolling of sections, drawing and straightening
of round wires, rolling and straightening of shaped wires**

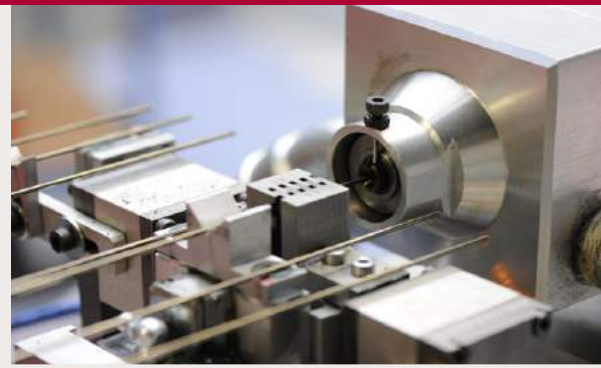

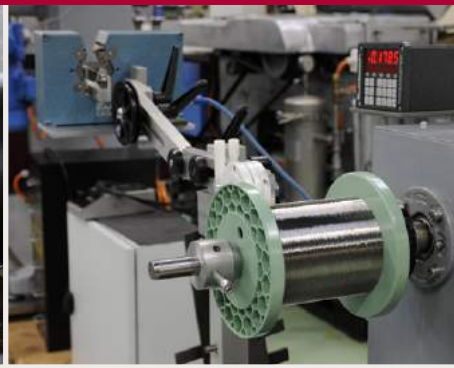

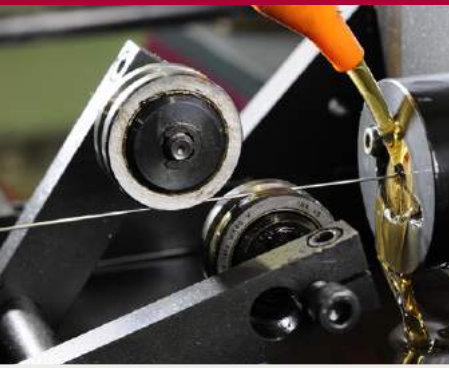

Our family business is located in the heart of the Jura region, an area well known for the quality of its products, especially in the field of precision.

Our motto «la haute précision à votre écoute» perfectly emphasizes our company's philosophy : More than a simple supplier we would like to be considered as a full partner by our clients. We accompany them from the sketch to the finished product, so that they obtain exactly the product and service they desire.

Our production equipment, our know-how and our constant commitment to innovation enable us to provide a personalized assistance.

The high competency of our employees and permanent quality-controls warrant high precision and irreproachable quality for : wire drawing, rolling of sections, drawing and straightening of round wires, rolling and straightening of shaped wires.

Our clients are mainly factories of the automatic turning industry ; thus our deliveries can be found in a large variety of finished products.

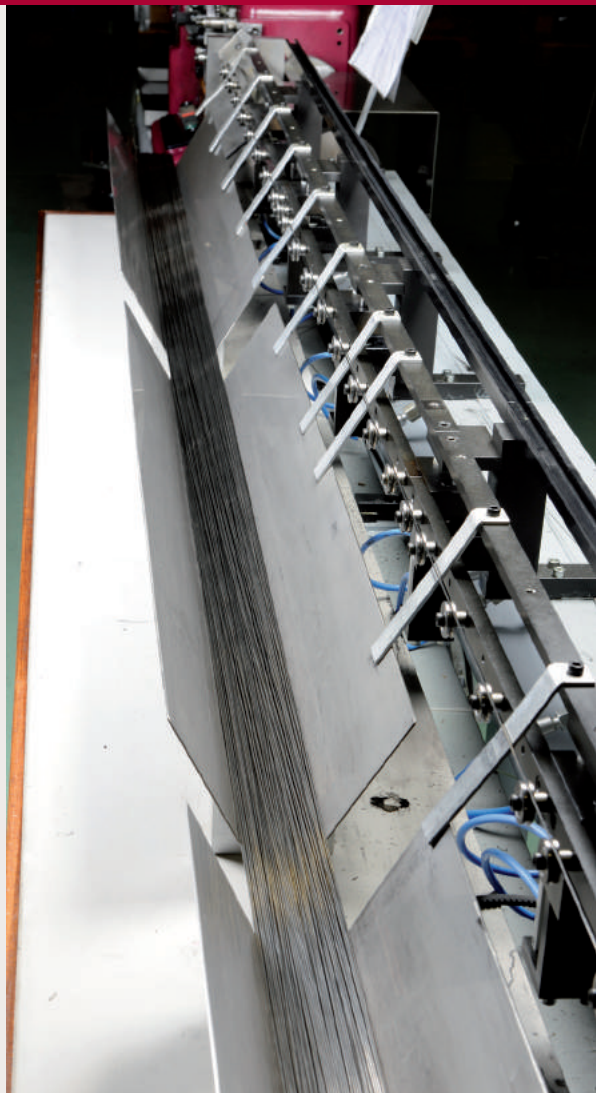

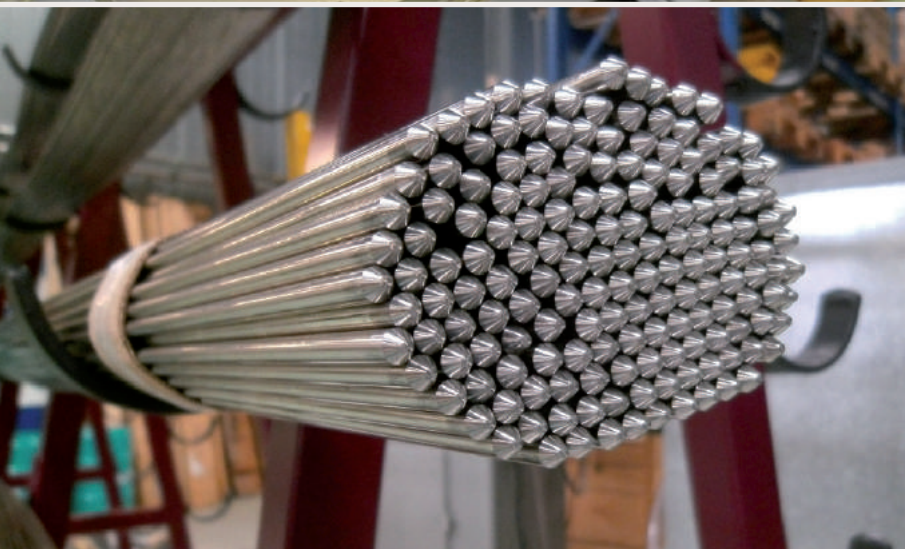

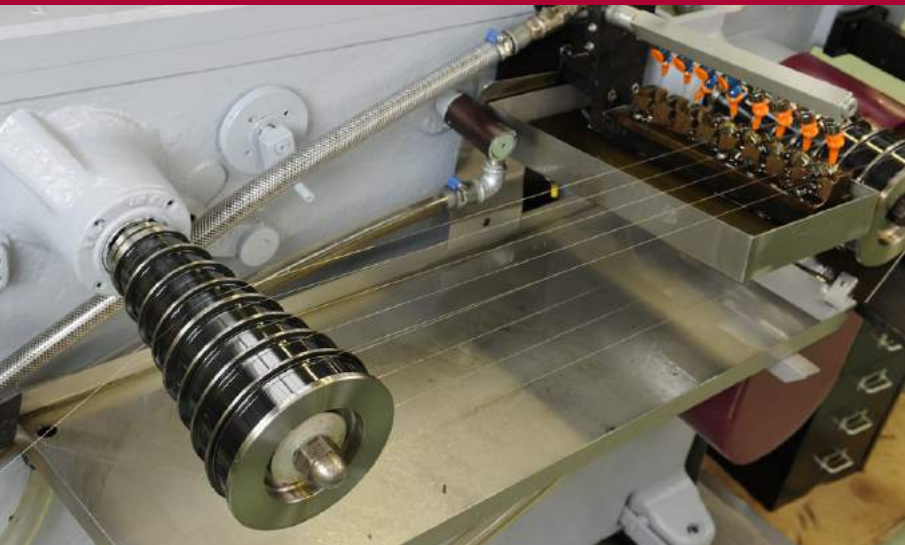

We are a raw material supplier as well as a transformation unit for stainless and spring stainless steel, hardenable stainless steel, titanium and its alloys, non ferrous metals and special alloys to precise client specifications.

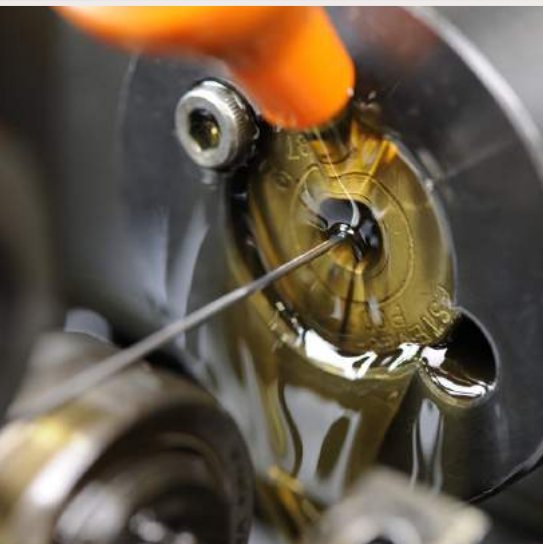

We secure you steady supply and a high availability of raw material thanks to our close collaboration with reputed providers.

We may deliver your products in a variety of different packaging that includes coils, reels, bars and so on.

Our large manufacturing space and our adaptable equipments allow us to respond quickly and at all time to your expectations.

Our pledge to continuous improvement leads us to build or adapt most of our production tools and appliances ourselves.
